ADJ F/G Pounds of feed required for one pound of live weight gain adjusted for an animal's body weight.

Lower is more desirable.

RFI The difference between an animal's actual feed intake and the predicted intake based on the size and growth during the test.

Lower is more desirable.

RG The difference between an animal's actual weight gain and the predicted gain based on intake and body weight.

Higher is more desirable.

FE Index An Index to combine value of gain and cost of intake based on intake and body weight.

Higher is more desirable.

* 1/2 Red Angus 1/2 Hereford - Estimated EPD with a Hereford base using MARC across breed adjustments
